 @ GMP - von Gerkan, Marg und Partner
 Technical design - Practical Completion
 The greatest refurbishment of a building undertaken in Europe will create one of the most eco-friendly high-rise buildings in the world - the headquarters of Deutsche Bank in Frankfurt.
 Energy consumption and CO2 emissions of the building will be reduced by at least 50 per cent.
- 2008 Project Orange, Moscow, Russia**
 @ Foster + Partners
 Feasibility Study
 The 80,000 sqm scheme for a contemporary art museum with commercial elements and housing is for development firm Inteco. The project is influenced by natural structures including that of the orange, a historic symbol of opulence in Russia. The circular plan, with five segments rising to 15 storeys, is designed to protect against the cold winter climate while allowing light deep into the building through glazed slots in the elevation.
